The **Care Club** Protection Plan includes all this and MORE...

1. **Dye test toilets** to identify leaks that could be costing you hundreds of dollars per year in wasted water.
2. **Repair faucet leaks** by tightening loose handles, packing nuts, or valve stems (*repairs requiring parts cost extra*). Eliminating a 1/32" diameter leak reduces your water bill by more than the annual investment in the **Care Club!**
3. **Check pumps** by inspecting to see if there is any debris, watch operation, check battery.
4. **Clean kitchen faucet aerator** for steady water flow.
5. **Inspect visible piping for leaks and corrosion** to identify potential leaks before they occur.
6. **Check emergency shut-off valve operation** to ensure the valves will be available when needed.
7. **Tag emergency shut-off valves** so you can easily identify the proper valves during a water crisis.
8. **Check washing machine hoses** for material flexibility and integrity, to identify the potential for hose rupture from deterioration.
9. **Clean and adjust free standing gas water heater pilots** to ensure uninterrupted hot water.
10. **Clean and adjust gas water heater burners** to optimize the burn. Extending life and reducing energy use.
11. **Inspect the water heater anode rod (s) if accessible** to identify when rod replacement might prevent costly storage tank failure.
12. **Flush water heater tanks** to remove sediment build-up from your home water system, extend water heater life, and improve water heater recovery and performance. (*proper valve required*)
13. **Test gas water heater gas lines** for life threatening leaks.
14. **Inspect gas water heater exhaust flues** for leaks that might introduce deadly carbon monoxide to your home.

When you invest in the **Care Club**, you can't lose! You get your money's worth!

- + Your warranty is extended to **2 years** on most repairs for **Care Club** owners.
